**1kb DNA Ladder**

**Description** 1kb DNA Ladder is a convenient marker for determining the size of double-stranded DNA from 250 to 10,000 base pairs. The ladder consists of 15 fragments that range in size from 250 to 10,000 base pairs. The 1,000 and 3,000bp fragments have increased intensity relative to the other bands on ethidium bromide-stained agarose gels and serve as reference indicators. All fragments are blunt-ended.

**Fragments sizes (kb)** 10.0, 8.0, 6.0, 5.0, 4.0, 3.0 x 2, 2.5, 2.0, 1.5, 1.0 x 2, 0.75, 0.5, 0.25.

**Loading** The recommended amount of size marker to load on an agarose gel is 1µg/lane.

**Storage Buffer** 10mM Tris-HCl (pH 7.8), 10mM NaCl, 1mM EDTA

**Storage** Store at -20°C.

<u>Cat#</u>	<u>Pack size</u>	<u>Price</u>
305005	0,05mg	
305025	0,25 mg	

Version 1.1 01.03
